

Marin Science Seminar Presents

How a Game Show can Help us Understand the Effects of Climate Warming on Animals

with Alex Gunderson, PhD
of the Romberg Tiburon Center for
Environmental Studies

**A one-hour multimedia presentation for Marin
High School Students and Teens in Marin**

Wednesday, November 19th, 2014

7:30 – 8:30 pm

Terra Linda High School, Room 207
320 Albion Way, San Rafael, CA 94903

The Price is Right is a game show where people can win exciting prizes like cars, vacations, and washing machines. It also happens to provide a great analogy for describing one of the most important problems in biology today: What impact will rising global temperatures have on plants and animals? With the help of "The Price is Right", I will talk about what we are learning about the biology of climate change and give some examples from my own research on tropical lizards.

Alex Gunderson is a physiological ecologist who specializes in thermal biology. Currently he is a Postdoctoral Fellow at the Romberg Tiburon Center for Environmental Studies. He holds a PhD from Duke University and an MS from the College of William and Mary.
