Marin Science Seminar Presents

Making Medicine Safer

with Drugs, Devices, Software & More
with Art Wallace MD PhD

A one-hour multimedia presentation for Marin High School Students and Teens in Marin

Wednesday, October 23rd, 2012 7:30 – 8:30 pm Terra Linda High School, Room 207 320 Albion Way, San Rafael, CA 94903

Medical care over the last 150 years has dramatically improved through a combination of research, education, invention, and development. Dr Wallace will discuss the development of drugs, devices, and software that have made anesthesia, surgery, and medical care safer and more effective. How does a drug get developed? How does a medical device get developed? How do you test a new therapy? How do you figure out if a surgical operation works? How does medical research create the new medical care?

Dr. Wallace is a Professor of Anesthesiology and Perioperative Care at UCSF Medical Center, and Chief of Anesthesia at the San Francisco VA Medical Center. Dr. Wallace holds a B.S. in Engineering from Yale University and received his M.D. and Ph.D. from Johns Hopkins School of Medicine. His Ph.D. is in Biomedical Engineering.
