

Marin Science Seminar Presents

Human Embryonic Stem Cells A Primer

with Susan Fisher, Ph.D. of UCSF

A microscopic look at a lab dish whose contents are derived from human embryonic stem cells

A one-hour multimedia presentation for Marin High School Students and Teens in Marin

Wednesday, March 28th, 2012

7:30 – 8:30 pm

Terra Linda High School, Room 207
320 Albion Way, San Rafael, CA 94903

Dr. Fisher's lab studies the mechanisms used by cells of the human placenta to invade the uterus during normal pregnancy. The lab also studies the earliest stages of human development using human embryonic stem cells as a model system. **Join us and learn!** ☺

Susan Fisher, Ph.D. is the Director of Translational Research in Perinatal Biology and Medicine at UCSF. She is also a Professor in the Departments of Oral Biology, Pharmaceutical Chemistry, and Anatomy and Faculty Director at the Biomolecular Resource Center, UCSF. She is a member of the UCSF Biomedical Sciences Graduate Program (BMS).
