

Marin Science Seminar Presents

Into the Woods with Marine Biology

Sunken Wood in the Deep Sea & the Critters that Call it Home

with Jenna Judge PhD

**A one-hour multimedia presentation for Marin
High School Students and Teens in Marin**

Wednesday, September 9th, 2015

7:30 – 8:30 pm

Terra Linda High School, Room 207
320 Albion Way, San Rafael, CA 94903

We've all seen driftwood on the beach, but did you know that enough wood makes it to the sea floor that specialized animal communities use it as a home and some can even eat it? In this talk, you'll dive to the depths of Monterey Bay with Dr. Judge to explore the diversity of animals that colonize sunken wood and the role that wood type, shape, and texture plays in shaping the animal communities that colonize it.

Jenna Judge is a recent doctoral graduate of the department of Integrative Biology at UC Berkeley. She grew up in South Lake Tahoe and went to college for her BS in aquatic biology at UC Santa Barbara.
