

Marin Science Seminar presents

Making Faces

Developmental Mechanisms of Craniofacial Evolution

with Rich Schneider Ph.D. of UCSF

Diamond-encrusted skull by Damien Hirst

A one-hour multimedia presentation for High School Students and Teens in Marin

Wednesday, September 10th, 2014

7:30 – 8:30 pm

Terra Linda High School, Room 207
320 Albion Way, San Rafael, CA 94903

Dr. Schneider will overview experiments in his laboratory that have revealed molecular and cellular processes involved in facial patterning. He will describe how his studies to understand the basis for skull shape in breeds of dogs led him to create a cell transplant system whereby duck embryos develop with quail beaks.

He will bring an assortment of skulls.

Dr. Schneider is a Professor in the Department of Orthopaedic Surgery at UCSF, and in 2004 he was made Director of the Department's Molecular & Cell Biology Laboratory on the Parnassus Heights campus.
